# FREE YOUR BUSINESS WITH SOLAR POWER

Lower bills, reduce reliance on the grid, build a green reputation, and increase the value of your business... Solar & storage achieves all this.

At Naked, our 'no commission, no ties' policy means you choose from all products on the market. Since 2010, we've helped businesses build energy independence & grow opportunities through 100% impartial solar advice.

# POWER TO YOUR BUSINESS **NOT YOUR** **ENERGY SUPPLIER**

**Cut carbon emissions, increase  
energy security, improve your  
reputation and save money**

**UK solar energy adoption is growing at lightning speed. Rapid technological advances mean systems are better value, longer lasting and more efficient than ever. It now pays to go green.**

With solar PV and storage your business can slash electricity costs by up to 90% while strengthening your brand reputation at the same time. A clear sustainability policy improves supply chain relationships, increases tender opportunities and wins new customers.

Naked work with multiple businesses big and small, in all sectors, helping them turn dead roof space or waste land into cost cutters and carbon reducers. **We can do the same for you.**

At Naked, we discuss your needs and priorities, compare all systems, then offer you a range of options. We're only comfortable installing solar once we're certain you have all the information you need to **make an informed choice.**

# Watt POWERS WHAT?

Solar panels & storage energize your business and offset your carbon footprint. A 25-37 panel 10kWp system will generate around 10,000 kWh per year. This will:

Light up 1500 people's workspaces

Power 12 people's work stations

Save a massive 6 tonnes of CO<sub>2</sub>e

# THE REWARDS OF ACTING RESPONSIBLY

**With solar, you do your bit for a greener future and make a sound long-term investment.**

---

**Average payback:** 5-8 years. Quality panels last 25-50 years. After payback, the rest is just free energy.

---

**Average ROI:** 12%+ It's like buying all future electricity at a heavily discounted fixed price.

---

**Energy security:** Create your own power. Avoid future brownouts and rationing.

# 10 REASONS TO GO NAKED

**1. Expert installation.** We're NICEIC accredited & go above & beyond MCS quality standards & the Renewable Energy Consumer Code.

**2. Guaranteed work.** Our installers are full-time employees. They're reliable, courteous & tidy. All labour comes with a 10-year warranty.

**3. Unique service.** Unlike other companies, we design quality custom systems in house, using advanced [PV Sol software](#).

**4. Accurate forecasts.** Informed choice relies on good information. We show clearly how much energy you'll generate & what savings to expect.

**5. Whole market choice.** No commission, no ties means honest advice. Compare & combine systems to meet your exact business needs.

# 10 REASONS CELEBRATING 70 YEARS CONTINUED...

**6. Fast surveys.** Site visits take around 1 ½ hours. You'll get a personalised forecast with a range of options within 2 working days.

**7. Regular contact.** Throughout the process, you're kept in the loop about options, prices and timings. No nasty surprises, no waiting around.

**8. Award-winning.** We believe passionately in solar & want you to feel the same way. Our honest approach has won multiple awards.

**9. After care.** Problems are few, but if you need help, we'll sort it. We treat people the way we'd like to be treated.

**10. Lifelong advice.** Get the most from your solar for years to come. Visit our owner's area for latest developments or call us.

# SOLAR ENERGY REWARDS ARE HARD TO BEAT

---

St Ewe Eggs: a case history

## Why they came to us

Richard Tonks had huge electrical demands on his egg farm and wanted to explore ways of reducing his bottom line. He looked into solar energy as a solution and decided to invite some solar installers to quote. Richard was focused on getting the shortest payback period.

## How we helped

At Naked Solar, we use the very powerful PV Sol professional solar panel design software. This meant we were able to show with great accuracy how much St Ewe Eggs could reduce their electricity bills. It also allowed Richard to choose a set up that would give the shortest payback. He went for a 24kWp system. Six months later he returned to us and installed a further 50kWp.

# THE POWER & THE PAYBACK

St Ewe Eggs: a case history

Annual energy generation:	74722 kWh
Return on investment:	19.8%
Payback period:	5.1 years
Annual CO2e reduction:	44.8 tonnes

“

The detail and understanding of the numbers presented by Naked Solar allowed me to make a good decision. Both installations went smoothly with no disruption to our operation.

Naked Solar's forecasts turned out to be slightly conservative as both systems have exceeded expectations.

Richard Tonks, Owner - St Ewe Eggs
